Canary Excel Add-In

Simple To Use Interface Between Excel And Canary Enterprise Historian

The Canary Excel Add-in provides users the ability to use Microsoft Excel to access data directly from the Canary Enterprise Historian. The Canary Excel Add-in allows data to automatically load an Excel report each time the file is opened. Use the Excel Add-in to plug into Excel to increase functionality for reports, graphs, custom displays and analytical purposes.

Key Features

● Easy to set up and install.

● Data can come from local or remote historians

● Data from different historians can be combined

● Uses the Canary WebService
