BUSWARE Ethernet I/O OPC Server

Kepware's BUSWARE Ethernet I/O device driver works in conjunction with our OPC Server KEPServerEX to provide data exchange between OPC Clients and BUSWARE Ethernet RTUs using Modbus OPEN UDP protocol. KEPServerEX automatically optimizes your data acquisition based on client demand. Data integrity is ensured with our extensive error handling.

The BUSWARE Ethernet OPC Driver is also included in the Manufacturing Suite.

Plug-in Driver Features:

- Access Analog and Discrete I/O
- Access Discrete I/O in Bit, Byte, and Word formats for high speed updates
- Optimized Ethernet connection provides up to 154 read/write operations per second
- Designed for SoftPLC I/O
- All Data types supported

Application Support

- OPC Data Access (OPC DA) Versions 1.0a, 2.0, 2.05a, 3.0
- OPC Alarms and Events (OPC AE) Version 1.10
- OPC Unified Architecture (OPC UA) Version 1.01
- OPC Express Interface (OPC Xi) Version 1.00
- SuiteLink and FastDDE for Wonderware
- NIO Interface for iFIX
- DDE Format CF_Text and AdvancedDDE

Protocol

- Modbus Open Protocol over Ethernet using Winsock V1.1 or higher

Supported Devices

- **E200-FB00** - Ethernet I/O modules
 - **E201-8B00** - Ethernet I/O modules
 - **E290-FB00** - Ethernet I/O modules
 - **E151-FB00** - Ethernet I/O modules
 - **E190-8B00** - Ethernet I/O modules
 - **E250-FB00** - Ethernet I/O modules
 - **E300-FB00** - Ethernet I/O modules
 - **E191-CB00** - Ethernet I/O modules
 - **M200-FB00** - RS-485 I/O connected through and Ethernet I/O module
 - **M290-FB00** - RS-485 I/O connected through and Ethernet I/O module
 - **M151-FB00** - RS-485 I/O connected through and Ethernet I/O module
 - **M190-8B00** - RS-485 I/O connected through and Ethernet I/O module
 - **M181-4B00** - RS-485 I/O connected through and Ethernet I/O module
 - **M250-8B00** - RS-485 I/O connected through and Ethernet I/O module
 - **M300-8B00** - RS-485 I/O connected through and Ethernet I/O module

Drivers "Plug-in" to KEPServerEX

The BUSWARE Ethernet I/O OPC Server is a plug-in device driver for KEPServerEX. A "Plug-in" is a software program (.dll) that extends the capabilities of KEPServerEX to fit the communication requirements of a specific device or system. The plug-in driver handles all of the proprietary communications between the device/system and the OPC layer, KEPServerEX. The KEPServerEX core then handles all OPC and Proprietary Client communications between the plug-in driver and the Client application. For a complete list of features and capabilities please visit the KEPServerEX overview page.

- OPC Foundation Certified - The Best of OPC on the Market
- High Performance - Multi Threaded - Runtime Configurable
- Detailed Protocol Diagnostics - Communications Trace
- Detailed OPC Diagnostics - Communications Trace
- Native Interfaces - Client Connectivity Beyond the OPC Standards
- Stratus High Availability Computing - Certified
- Marathon High Availability Computing - Certified
- Kepware 2 Hour Demonstration Mode on all Products
