Wonderware InTouch Client Driver OPC Server

The Wonderware InTouch Client Driver was designed specifically for use with KEPServerEX OPC Server to expose Wonderware InTouch tag databases to OPC clients. This includes all I/O and memory tags in the InTouch Tag Database, including configured local and remote tags. KEPServerEX automatically optimizes your data acquisition based on client demand. Data integrity is ensured with our extensive error handling. Wonderware InTouch 7.1 or higher is required. InTouch 7.11 and higher cannot be installed on Windows 98 systems.

The InTouch Client Driver is also included in the Manufacturing Suite.

Vip Vendor Integrated Protocol

Wonderware recognizes Kepware and KEPServerEX as their preferred communication company and Server for the InTouch Client Driver

Plug-in Driver Features:

- Automatic Tag Database Generation
- Imports tags defined in your Wonderware InTouch applications, greatly reducing your project development effort
- Three modes of data access that you can use to optimize your communications with InTouch. Can obtain data via, (Driver polls InTouch, InTouch notifies driver, Combination)
- Addresses with Mode Override
- All major data types are supported

Protocol

- N/A

Application Support

- OPC Data Access (OPC DA) Versions 1.0a, 2.0, 2.05a, 3.0
- OPC Alarms and Events (OPC AE) Version 1.10
- OPC Unified Architecture (OPC UA) Version 1.01
- OPC Express Interface (OPC Xi) Version 1.00
- SuiteLink and FastDDE for Wonderware
- NIO Interface for iFIX
- DDE Format CF_Text and AdvancedDDE

Supported Devices

- This driver can import tags defined in an InTouch project. Devices are dependent on the Wonderware InTouch application. The Intouch client driver can only connect to an Intouch Project Tag Database running on the same PC that it is on

Drivers "Plug-in" to KEPServerEX

The InTouch Client Driver OPC Server is a plug-in device driver for KEPServerEX. A "Plug-in" is a software program (.dll) that extends the capabilities of KEPServerEX to fit the communication requirements of a specific device or system. The plug-in driver handles all of the proprietary communications between the device/system and the OPC layer, KEPServerEX. The KEPServerEX core then handles all OPC and Proprietary Client communications between the plug-in driver and the Client application. For a complete list of features and capabilities please visit the KEPServerEX overview page.

- OPC Foundation Certified - The Best of OPC on the Market
- High Performance - Multi Threaded - Runtime Configurable
- Detailed Protocol Diagnostics - Communications Trace
- Detailed OPC Diagnostics - Communications Trace
- Native Interfaces - Client Connectivity Beyond the OPC Standards
- Stratus High Availability Computing - Certified
- Marathon High Availability Computing - Certified
- Kepware 2 Hour Demonstration Mode on all Products
