"THE WORLD LEADER IN COMMUNICATIONS FOR AUTOMATION"

Manufacturing OPC Server Suite

Kepware's Manufacturing OPC Server suite for KEPServerEX gives the industry professional a comprehensive list of drivers to work with at an affordable price. You will get access to all of our standard $795 drivers for use on a single PC/Machine.

The manufacturing suite will allow you to automatically connect to devices on the shop floor, read and write data to those devices, and fully integrate the data into your HMI, SCADA, MES, Historian or ERP System. Our ease of use and high reliability ensure that Kepware software can be set up quickly and will operate flawlessly.

KEPServerEX delivers a unique architecture for suites and any additional drivers added to a suite - One Communications Server to manage, One Name Space, and One set of Diagnostics. That's why Kepware is number one.

KEPServerEX is a versatile communication software server supporting a wide variety of client/server technologies including:

OPC Data Access Version 1.0a	DDE Format CF_Text
OPC Data Access Version 2.0	DDE Format AdvancedDDE
OPC Data Access Version 2.05a	NIO Interface for iFIX
OPC Data Access Version 3.0	ODBC (Open Database Connectivity)
FastDDE for Wonderware	Oracle MES and MOC
SuiteLink for Wonderware	

*Partial List – Devices not listed may be supported; please contact a Kepware Account Manager for a complete up to date listing.

Manufacturing OPC Server Suite:

- Over 100 of the most common drivers found in the Manufacturing Industry.
- OPC UA Client Driver - OPC Tunneling

Other Useful Kepware Products:

- Industrial SNMP Driver - Driver to Monitor and Manage SNMP Managed Devices (Network Infrastructure, Bridges, Routers, UPS Systems, etc.)
- Ping Driver - Driver to monitor basic PING compliant network devices (See IT & Infrastructure Suite)
